DAKSH VASUDEVA / CHITKARA UNIVERSITY, PUNJAB

Release Your Firefly

How an idea became a campus you can enter.

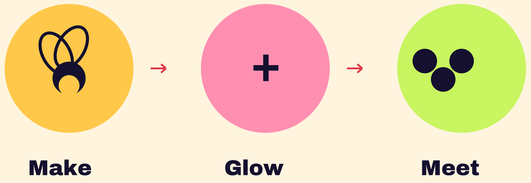

Observe. Prompt. Correct. Build. Try.

THE IDEA

A reason to meet.

Make something. Find your people.

A campus gallery became a way to connect students through what they make.

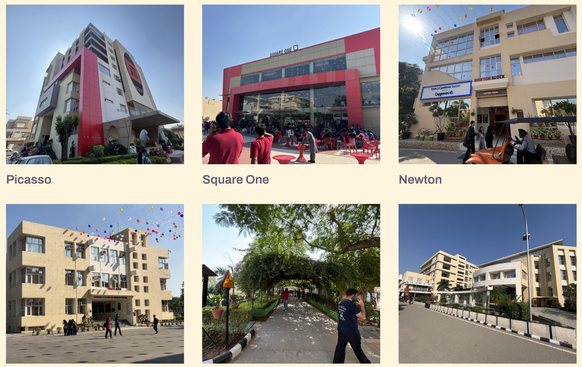

One-way appreciation. Mixed-school constellations. One piece together.

Campaign: 14 days · groups of 3–5 · meet at 9 PM

ON THE GROUND

I went back to campus.

My photographs supplied the details the map could not.

27 supplied campus photographs · fronts, paths and meeting spots

THE LAYOUT

Place came before polish.

Satellite references + mapped roads + named blocks.

Satellite reference

Campus map references

DIRECTING CLAUDE

I kept correcting it.

Short excerpts from my prompts, not a one-shot build.

BRIEF THE BUILD

“artistic 3d style interface”

Phones + laptops · campus map + photographs

CORRECT THE SITE

“roads still quite dont match the real. layout”

Replace guessed routes with mapped roads

CORRECT THE DETAILS

“red on buildings as details”

Entrances, paving, light and thinner outlines

THE 3D WORLD

Reference became a place.

Claude-assisted Three.js model, refined through feedback.

Current web model · illustrated night lighting

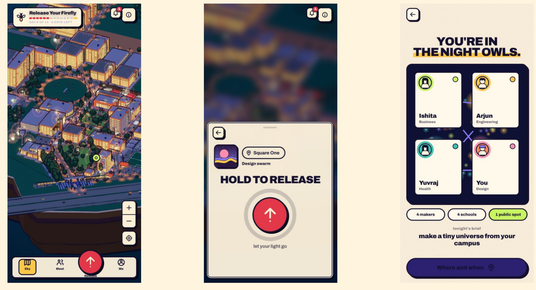

Day / night studies

THE INTERFACE

A visual language to touch.

GPT SVG kit + Claude integration + working interactions.

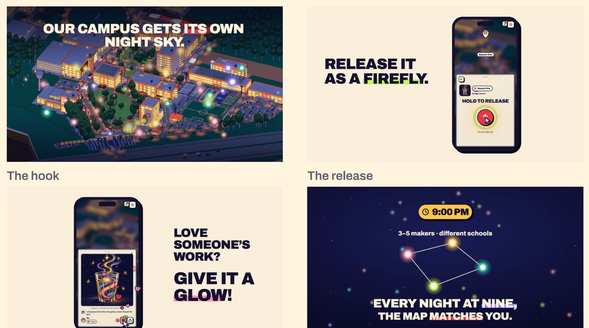

Explore · Hold to release · Meet preview

THE EXPERIENCE

I choreographed the journey.

Voiceover + app moments + camera and cursor direction.

The hook · The release · The Glow · Finding your people

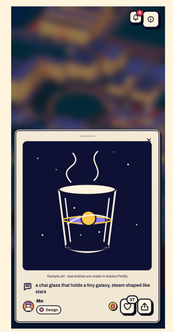

ElevenLabs voiceover · edited as an experience film

TRY IT

The prototype is public.

An open demo reviewers can explore themselves.

Scan to explore

OPEN THE CAMPUS

daksh407.github.io/release-your-firefly

No sign-in. Sample people and meetings. Releases and Glows stay on each device.
